crazy sapper 3d

Very good, simple fast RTS-like for evening or two. (5.5h to get through companies - not 100%). It's not a game, it's a piece of modern art. Problem is, it is a boring experience, the "wisdom" it tries to convey a banality, the "warning" it contains so obvious it's absurd. A complete waste of time.

The "wisdom": Stopping to interact with people in favor of gaming will isolate you ... what an amazing revelation. Not.

The "warning": Putting your life at the mercy of an untested technological system is a bad idea. In this game it might possibly be something as breathtaking as an AI that is developing consciousness and autonomy, but [Occam's Razor](https://en.wikipedia.org/wiki/Occam's_Razor)[en.wikipedia.org] says the main character simply experienced a bug or a hack in a brand new piece of software.. Favorite soundtrack, favorite game. Worth every cent!. Great Game!. A fun music game. This game proves that 3D platformers are alive and well with interesting levels and music. However the kicking can be a bit delayed at times, though this does not affect my overall experience with the game. I hope that this game will continue to get better over time.

\u2610 Sonic '06. At first i was like, this looks like another crap FPS but once you get playing it, if the graphics dont drw you in the intence gameplay will. (only on hard) simple but yet fun game.. Fantastic DLC, dare I say the best added yet. Interesting mix of new units that explores a period of history seldom seen in games, and you can tell the devs took time to develop the factions with unique looks\units. And of course...Egyptians! 10V10 Highly recommend!. This game is unbearably broken. Just, just don't get it. I like the art style and it *looks* fun but there is basically no explanation of controls. So you sit down and slide your entire hand down your keyboard to try and find the right button to do the right thing, and then you have to click each button to narrow it down to the correct button. And this isn't game breaking but you can literally pause the title screen. Wa- what?! I got into the game FINALLY and then my character just wasn't moving at all. I tried every single button on my keyboard. Just don't get this game, it's not much money but don't waste your time. And it doesn't seem to have full controller support. This is the first negative review I've written and I've got to admit, I kinda feel bad but this is just outrageous.

And the developer has Disposable Heroes 2 on steam greenlight so hopefully the next game is much better and I can give it a positive review.. You can't run this game in a 4K resolution (3840 X 2160 or 4096 X 2160)! This game is great, but there is no excuse for not supporting a resolution over 720P!. Game is fine,but the lack of save point or quick save ruin my interests on this game. I am good stealth player and I enjoy playing stealth game. But when I play this game, I always get into a situation dat I made a small mistake and to make a perfect stealth, I have to go through the mission again from the very starting point. This is just annoying and boring. Because of this I cant recommand this game.. **Super Mega Neo Pug ...**

... has a great Soundtrack and a fluent Gameplay. Its absolutely worth your 60cent and it IS better than all these other free-to-pla-mobile-games (Take-my-Money-Prinzip). Maybee we will see a Super Mega Galactic Power Super Deluxe Pug later this Month^^. Utterly cancerous. I love it.
